Re: Cornell-Dubilier Electronics Site, Hamilton Industrial Park,
333 Hamilton Boulevard, South Plainfield, Middlesex County, NJ

Dear Mr. Sundram:

The following is in response to your Request for Information concerning the above referenced site:

1. a. DSC of Newark Enterprises, Inc.
70 Blanchard St.
Newark, NJ 07105
- b. Anthony A. Coraci, President and Treasurer
Vincent J. Coraci, Chairman and Secretary
70 Blanchard St. Newark, NJ 07105
- c. Corporation
State of incorporation: Delaware
Date of incorporation: August 1, 1988
Agent: The Company Corp.
3 Christina Center
201 N. Walnut St.
Wilmington, Delaware 19801
Agent in NJ: Anthony A. Coraci
70 Blanchard St.
Newark, NJ 07105
- d. N/A

OCT 15 1996

2. Lamitex, Inc./CRD Realty Corp. operated the facility as a rental property until 1976 when Lamitex/CRD Realty Corp. was sold to Marco Investing Corp. which then was sold in 1987 to DSC of Newark Enterprises, Inc. DSC currently owns the property. Various tenants have occupied portions of the facility and have conducted different types of operations. The various owners never occupied this site. Please see attached Preliminary Assessment of May, 1995 and attached sheet which updates tenant list.

3. There is no legal relationship between the Company and Norpak Corporation. The company works in the same office as Norpak Corporation and the officers of both firms are identical.

4. Please see attached Preliminary Assessment of May, 1995, Attachment I and attached sheet which updates tenant list.

5. No. Federal Pacific was the owner of Cornell-Dubilier Electric Corp.

6. Chemicals used by past and present tenants: Epoxy resins, polyester resin, turpentine and acetone used in the design and prototype of automotive parts; paint, paint thinner, degreaser, oil and grease used in the

701232

fabrication of material handling products; PVC sheet vinyl used to make binders; cleaning solvents used in the manufacturing of cabinetry; metallic oxides used to make compound ceramic formulations. Also see Attachment II of attached Preliminary Assessment of May, 1995 and attached sheet which updates tenant list. Not fully knowledgeable about tenant's operations. DSC does not operate at the site.

7. Epoxy resin, polyester resin, turpentine and acetone stored on shelves and in cabinets; paint, paint thinner, degreaser, oil and grease stored on racks and shelves; PVC sheet vinyl stored in ambient conditions; cleaning solvents stored on racks and shelves; metal oxides stored in fiber drums. Also see Attachment II of attached Preliminary Assessment of May, 1995 and attached sheet which updates tenant list. Not fully knowledgeable about tenant's operations. DSC does not operate at the site.

8. Not fully knowledgeable about tenant's operations. DSC does not operate at the site.

9. Yes. Arrangements were made with S&D Environmental Services, Inc. in 1990, L&L Oil Service, Inc. in 1990, Stan's Lawn Service in 1990, ENSA Environmental in 1994, ICF Kaiser in 1996. S&D was to do the cleanup of an oil spill. L&L Oil was to clean a 150,000 gallon aboveground storage tank, Stan's Lawn Service was to dig holes and fill them in with new soil, ENSA Environmental was to prepare a Preliminary Assessment report and ICF Kaiser was to prepare a Site Investigation report. Lester Pae, building manager for DSC, was involved. See attached for copies of contracts, manifests and invoices. The work of S&D Environmental Services, Inc., L&L Oil Services, Inc., and Stan's Lawn Service ended in 1990. The work of ENSA Environmental ended in 1995 and ICF Kaiser is currently acting as a consultant for DSC. See attached Preliminary Assessment of May, 1995 and attached sheet which updates tenant list.

10. No.

11. Not by DSC and not to our knowledge by tenants.

12. Lester Pae
70 Blanchard St.
Newark, NJ 07105

609-394-0333

13. No.

14. The site was purchased from Cornell-Dubilier Electric Corp. We are attempting to locate purchase documents.

15. No.

16. None.

17. We are attempting to locate purchase documents.

18. The Company is currently undergoing a Memorandum of Agreement (MOA) with the New Jersey Department of Environmental Protection with an effective date of July 14, 1994. A release of fuel oil was remediated in July of 1990. At the same time, a 150,000 gallon above ground storage tank was cleaned as part of the decommissioning process. The consulting costs incurred in the MOA to date are \$1,800.00, plus legal fees. The costs incurred in the cleanup of the release of fuel and the cleaning of above ground storage tank were \$45,605.95. See also the response to question #9.

19. Aside from the work performed by the EPA, ICF Kaiser is currently working on a Site Investigation report, ENSA Environmental did a Preliminary Assessment report, copy of which is attached, S&D Environmental Services, Inc. cleaned up an oil spill, L&L Oil and cleaned a 150,000 gallon aboveground

storage tank, Stan's Lawn Service dug holes and filled them with new soil. See also the response to question #9.

20. NJ DEP investigated the oil spill violation issued. See the response to question #9.

21. DSC used Stan's Lawn Service to dig holes in the soil and fill in the holes with new soil supplied by Stan's Lawn Service. See the response to question #9.

22. The Borough conducts periodic fire, building, electrical inspections. No file is maintained on such inspections.

23. See response to question #9.

24.

a. See response to question #9.

b. Property has not been insured for many years. Old policies were not saved.

c. See response to question #9.

d. N/A

e. N/A

f. See response to question #9.

g. N/A

25. None.

26. A.A. Coraci-President and overall manager
Lester Pae-Building Manager.

27. Lester Pae, Building Manager, S&D Environmental Services, Inc. and L&L Oil Service, Inc. as described in the response to question #9.

28. See attached Preliminary Assessment of May, 1995, Attachment I and attached sheet which updates tenant list.

<u>DSC of Newark Enterprises, Inc.</u>	<u>Owner</u>	<u>4/24/87</u>	<u>Present</u>

2A. Provide a brief description of the past operation(s) (e.g., industrial/commercial) conducted on site by each owner and operator (Attach additional sheets if necessary).

See Attachment I

2B. Include a detailed description of the most recent operations subject to this preliminary assessment (Attach additional sheets if necessary).

See Attachment I

3. Hazardous Substance/Waste Inventory: List all raw materials, finished products, formulations and hazardous substances, hazardous wastes, hazardous constituents and pollutants, including intermediates and by-products that are or were historically present on the site (Attach additional sheets if necessary).

Material Name	Typical Annual Usage	Storage Method/ Container Type/Size	Location Reference Keyed to Site Map	To Remain on site? If yes, indicate quantity
		<u>See Attachment II</u>		

4. Summary of Wastewater Discharge of Sanitary and/or Industrial Waste and/or sanitary sludges: present and past production processes, including dates, and their respective water use shall be identified and evaluated, including ultimate and potential discharge and disposal points and how and where materials are or were received on-site. All discharge and disposal points shall be clearly depicted on a scaled site map.

Columbia Products, Inc. occupies Building 5 (Hazardous Waste Generator #NJD981489925). Water is discharged to the public sewer, 450 gal per day from the stripping operator wastewater and 330 gal. per week from the hot water washer. Approvals for these discharges were obtained from the Middlesex County Utilities Authority, the Town of Sayreville and the borough of South Plainfield Engineer. Materials are received via truck and stored in drums, containers, cylinders and carbays.

Revision No: _____
Revision Date: _____

A. Provide a narrative of disposal processes for all process waste streams and disposal points. (Attach additional sheets if necessary).

Wastewater generated from Columbia Products, Inc.'s stripping operation is discharged to the sewer and has been approved by the Middlesex County Utilities Authority, the Town of Sayreville and the South Plainfield Borough Engineer.

B. Discharge Period:

From	To	Discharge Type & Quantity, if known	Discharge/Disposal Point
<u>5/85</u>	<u>Present</u>	<u>Wastewater Gal/Day</u>	<u>Sanitary Sewer</u>
<u> </u>	<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>	<u> </u>

5. In accordance with N.J.A.C. 7:26E-3.2(a) 3.i, provide a scaled site plan, depicting the site boundaries, known limits of fill, paved and unpaved areas, structures and any of the potential areas of environmental concern listed below.

In accordance with N.J.A.C. 7:26E3.1(c)1.v., a narrative shall also be provided for each area of concern describing the (A) Type; (B) Age; (C) Dimensions of each container/area; (D) Chemical Content; (E) Volume; (F) Construction Materials; (G) Location; (H) Integrity (i.e., tank test reports, description of drum storage pad); and (I) Inventory control records, unless a Department-approved leak detection system, pursuant to N.J.A.C. 7:1E or 7:14B, has always been in place and there is no discharge history. A site investigation must be completed in accordance with N.J.A.C. 7:26E-3.10 for all areas which require sampling.

<u></u>	<u></u>	<u></u>	<u></u>	<u></u>

G. Has the required evaluation of protectiveness of past remediations been completed for each area of concern for which a waiver is requested?

Yes X No

Are the appropriate certifications included?

Yes No

If No, then a waiver can not be considered by the Department and the applicant is expected to complete a site investigation for each area of concern to verify the presence or absence of contaminants above the current NJDEP cleanup criteria.

7. Historical data on environmental quality at the Industrial Establishment

A. Have any previous sampling results documenting environmental quality of the Industrial Establishment not received a no further action approval from the Department or been denied approval by the Department?

X Yes (See Attachment # V) No

Revision No:

Revision Date:

B. Have there been any known changes in site conditions or new information developed since completion of previous sampling or remediation? If sampling results were obtained, but are not part of this application, please explain below:

No

8. Provide a discussion of any remediation activities previously conducted or underway at the industrial establishment, including dates of discharges, remedial action taken, sample results, current status or copies of Department or other government agency no further action approval(s), if appropriate (attach additional sheets if necessary).

A notice of violation was issued to DSC of Newark Enterprises, Inc. for groundwater contamination by the NJDEP on June 26, 1990 following a release of fuel oil associated with the former boiler.

9. Discharge History of Hazardous Substances and Wastes:

A. Have there been any discharges of hazardous substances and wastes?

X Yes (Complete Items B-E) No

B. Was the Department notified of the discharge?

X Yes No (Go to Item 9D)

If yes, provide the case # 90-03-23-1336C

C. Was a no-further-action letter, negative-declaration approval or full-compliance letter issued as a result of the cleanup of this discharge?

 Yes (Submit a copy and go to item 9E) X No

D. Were sample results obtained?

 Yes X No

If yes, submit the results

Revision No:

Revision Date:

E. Provide a description of the discharge and the response and resolution.

The discharge was associated with the 125,000 gal. fuel oil tank located to the west of the boiler room. Following the release the impacted soil was removed and the concrete walls and floors that came in contact with the oil were cleaned.

10. Aerial Photographic interpretation for sites larger than two acres from 1932 to present or to the earliest photograph available (Attach additional sheets if necessary).

See Attachment III

11. List all federal, state and local environmental permits at this facility, including permits for all previous and current owners or operators, applied for, received, or both (Attach additional sheets if necessary).

Check here if no permits are involved X

A. New Jersey Air Pollution Control

Permit Number	Certificate Number	Date of Approval or Denial	Reason for Denial (if applicable)	Expiration Date

D. Resource Conservation and Recovery Act (RCRA) permit # N/A

E. All other federal, state, local government permits.

Agency Issuing Permit	Permit #	Type of Permit	Date of Approval or Denial	Expiration Date
<u>N/A</u>	_____	_____	_____	_____
_____	_____	_____	_____	_____

12. Summary of enforcement actions (including but not limited to, Notice of Violations, Court Orders, official notices or directives) for violations of environmental laws or regulations (attach additional sheets if necessary):

A. Check here if no enforcement actions are involved _____

B. (1) Name and address of agency that initiated the enforcement action

NJDEP Division of Hazardous Waste Management
Twin Rivers Professional Building, East Windsor, NJ 08520

(2) Date of the enforcement action 6/26/90

(3) Section of statute, rule or permit allegedly violated
NJSA 58:10-23.11e & NJSA 58:10-23.11c

(4) Type of enforcement action Notice of Violation
Copy Attached, Attachment V

(5) Description of the violation
Discharge of a hazardous substance

(6) How was the violation resolved?
The soil impacted by the petroleum was excavated and stockpiled on site pending disposal and the concrete floors and walls of the boiler room were cleaned.

Revision No: _____
Revision Date: _____

13. Site Map

A. In accordance with N.J.A.C. 7:26E-3.2(a) 3.i, submit a scaled site plan, detailing the subject lot and block, property and or leasehold boundaries, location of current and former buildings, fill areas, paved and unpaved areas, vegetated areas, and all areas of concern identified above and all active or inactive wells. See Figure 1

B. Scaled historical site maps and facility as built drawings (if available).

C. A copy of the United States Geologic Survey (USGS) 7.5 minute topographical quadrangle that includes the site and an area of at least one mile radius around the site. The facility location shall be clearly noted. If a portion of the USGS quadrangle is used, the scale, north arrow, contour interval, longitude and latitude with the name and date of the USGS quadrangle shall be noted on the map.

See Figure 2

14. List any other information you are submitting or which has been formerly requested by the Department:

I.1

DESCRIPTION OF PAST OPERATIONS

Hamilton Industrial Park

Information indicates that the South Plainfield Developing Company owned and operated on the site between 1922 and 1924. The Spicer Manufacturing Corporation owned the facility between 1924 and 1929 when the property was acquired by the Plainfield Manufacturing Company. The Spicer Manufacturing Company operated on site between 8/34 and 12/34 when the property was purchased by Cornell-Dublier Electric Corporation. Cornell Dublier Electric Corp. maintained an electrical manufacturing operation until 1961 when the property was purchased by CRD Realty Corp. CRD Realty Corp. operated the facility as a rental property until 1976 when CRD Realty Corp. formed Marco Investing Corp. Marco Investing Corp. subsequently formed DSC of Newark Enterprises, Inc. in 1987. DSC currently owns the property.

Various Tenants have occupied portions of the facility and conducted different types of operations. The following is a list of previous tenants and their operations:

<u>Tenants and Building #</u>	<u>Dates of Occupation</u>	<u>Use of Premises</u>
Deco-Foam Inc. (Building 1)	11/77 - 2/82	Light Assembly and Molding of Foam Plastic Products
Impact Exhibits (Buildings 1,1C)	1/81 - 7/86	Warehouse and Light Assembly
Quality Bandcap Inc. (Building 1A)	9/78 - 5/82	Tire Rebuilding and Repair
Gauazzi tire (Building 1A)	8/78 - 3/83	Storage and Distribution of Tires
McByrne Inc. (Building 1A)	6/82 - 4/84	Storage and Distribution of Tires
B&H Metal Products (Building 6,1A,1C)	2/84 - 6/85	Metal Stamping and Storage of Metal Parts

Mr. USA Import Inc. (Building 11)	7/88 - 11/89	Warehouse and Distribution of Frames, Pictures and Eyeglass Frames
Counties Inc. (Building 11)	11/90 - 8/92	Storage, Maintenance and Repair of Construction Vehicles and Equipment
M&L Distribution Inc. (Building 11)	1/93 - 2/94	Warehouse of Food Products
Edison Rubber Inc. (Building 12)	3/80 - 7/86	Warehouse and Distribution of Used Tires

<u>Tenants and Building #</u>	<u>Dates of Occupation</u>	<u>Use of Premises</u>
Commercial Lift Truck Inc. (Building 12)	9/86 - 2/90	Repair and Service of Fork Lift Trucks
Consumer Delivery Service (Building 12)	3/91 - 7/91	Delivery, Storage and Repair of Furniture
R&M Manufacturing (Building 12)	8/91 - present	Storage and Assembly of Cabinets
Jersey Environmental Material Supply Corp. (Building 13)	4/77 - 3/83	Warehouse of A/C and Plumbing and Heating Equipment and Supplies
JRS Machine (Building 14)	8/76 - present	Machine Shop
Plainfield Beauty Supply Inc. (Building 15)	8/82 - 4/87	Storage of Beauty Supplies
Gundaker Fabrication (Building 15)	6/87 - present	Manufacturer and Warehouse of Car Accessory Kits
Paley Construction Co. (building 16)	7/82 - 6/87	Storage of Construction Equipment
Stan's Lawn Service (Building 16)	8/87 - present	Storage and Repair of Landscaping Equipment
Bussel Realty Corp. (Building 17)	4/84 - 8/87	Real Estate Broker
BE&K Communications (Land)	11/83 - 9/84	Cable TV Construction
DSM Enterprises (Building 10)	2/95 - present	Awning Manufacturer
RupCoe Heating and Plumbing (Building 6)	11/94 - present	Storage of Plumbing and Heating Equipment
Henderson Electric (Building 17, 9B offices)	4/95 - present	Office Use
Transport Logistics (Building 13)	5/95 - present	Truck Repair

The facility is currently occupied and operated by Norpak Corp. (DSC of Newark Corp.) Seventeen tenants, Forman Industries Inc., Promotion Associates, M&B Die Co., Able Metro Moving & Storage Inc., Everlasting Floral Prod., Columbia Prod., Galaxy Steel Door, Pioneer Associates, R&M Manufacturing, DSM Enterprises, RupCoe Heating and Plumbing, Henderson Electric, Transport Logistics, JRS Machine, Gundaker Fabrication, Fabrication Tech., and Stan's Lawn Service currently occupy the above referenced portions of the site (Section I.1).

A brief description of the most recent tenant operations is outlined in the above table.

ATTACHMENT III

AERIAL PHOTOGRAPH REVIEW NORPAK SOUTH PLAINFIELD SITE

1940

The western portion of the photograph did not appear in the photograph though the portion that was visible appears much the same as it does today. .

1951

The buildings appear to be in the same configuration as they do the 1940 photograph and as they appear today. An area of exposed soil is present in the extreme southern portion of the property as well as to the south of the large above ground storage tank (AST).

1958

Some exposed soil is present in the extreme southern portion of the property. A berm is present around the AST, though no apparent debris or staining is present.

1962

The site appears much the same in the 1962 photograph as it does in the 1958 photograph though the low vegetation in the southern portion of the property contains scattered debris.

1974

The site appears to be in much the same condition in the 1974 photograph as it does in the 1962 photograph though to the south of building 14 there appears to be scattered equipment and debris including a possible trailer, boat and vehicles.

1991

The buildings appear the same in the 1991 photograph as they do in the 1974 photograph. The area to the south of building 14 appears to be a parking lot and storage area with low vegetation further to the south. Debris is apparent to the west of building 12.

ATTACHMENT IV
NARRATIVE SUPPORTING PROPOSALS FOR SAMPLING

Above Ground Tanks (AST's) and Piping

Several former AST's have existed at the site and several AST's are present today. The 125,000 gallon AST located to the east of building 11 has been cleaned as part of the decommissioning process therefore no sampling is proposed.

An AST was observed in the southern portion of building 13 over a concrete floor. No staining or floor drains were noted in the vicinity of the tank, therefore, no sampling is proposed.

Surface stains were noted around the AST located to the south of building 14 therefore sampling in the vicinity of this tank is proposed.

Five abandoned AST's, approximately 2,000 gallon capacity, are staged in the southeastern portion of the property. No staining or release into the environment was apparent in the vicinity of the five tanks therefore no sampling is proposed.

An AST was observed in a fenced enclosure in the western portion of the site. No staining or release into the environment was apparent therefore no sampling is proposed.

Underground Storage Tanks

One UST was reported to exist at the site. The UST is reported to be located at the southern end of building 11. The size age and contents of the tank are unknown therefore it is proposed that the tank be decommissioned and confirmatory post excavation sampling be conducted.

Rail Spurs or Sidings

A rail road spur is located between building 4 and building 5, between buildings 2 and 4 as well as in portions of the southern portions of the property. No apparent signs of discharge were apparent. Based on the observations taken during the site visit no sampling of these areas is proposed.

Above and Below Ground Pump Stations

A condensate return pumping station is located in a recessed area of the floor in building 1B. No indications of a release to the environment was observed therefore no sampling is proposed.

Sump

A 2 feet square sump of undetermined depth was located in building 15. A release of fuel oil occurred in this area and a Notice of Violation was issued by the NJDEP in June of 1990. The release was subsequently remediated and therefore no sampling is proposed.

Pits

Two pits were located between buildings 13 and 16 each pit measured approximately 2.5 feet by 2.5 feet with an undetermined depth. No staining or evidence of a release were apparent. No sampling is proposed.

Rail/Truck Loading/Unloading Areas

Loading docks were located between buildings 13 and 9C, the southern end of building 11, the northern end of building 1 and between buildings 2 and 4. No evidence of a release was apparent. No sampling is proposed.

Storage Pads and Areas Including Drum and/or Waste Storage

Drums of roofing material were stored in a fenced enclosure in the western portion of the site. No staining or stressed vegetation was observed. No sampling is proposed.

Dumpsters

Dumpsters were noted in between building 13 and 9C, building 13 and the water tower and to the western parking lot. No staining or evidence of a release was noted in the vicinity of the dumpsters, therefore no sampling is proposed.

Chemical Storage Cabinets

A pesticide storage cabinet was located in the southeastern portion of building 16. The containers were secured and stored on shelves and pallets at the time of the site visit and no staining or evidence of a release were apparent. No sampling is proposed for this area.

Floor Drains or Trenches and Piping

Concrete pipe chases reported to be used for the former steam lines were noted in many of the buildings. No evidence of a release to the environment was apparent during the site visit. No sampling is proposed.

Roof Leaders When Process Operations Vent to Roof

Roof vents were noted to be located above the process tanks in the southeastern portion of building 5. Columbia Products Inc. operates a spray booth and a carburetor cleaning operation in the southeastern portion of building 5. The emissions from the spray paint booth and the carburetor washing operation are reported in Attachment II. No sampling is proposed.

Storm Sewer Collection Systems

Storm sewer collection systems were noted at the northern end of building 1 and 6, to the east of building 13, between buildings 4A and 5, between building 10 and 9A and in the western portion of building 16. No hazardous materials were observed to be stored in close proximity to these inlets and no staining was noted therefore no sampling is proposed.

Surface Water Bodies

A creek marks the property boundary at the southeastern portion of the site. No materials were stored in close proximity to the creek and no evidence of a release from this site was apparent. No sampling is proposed.

Septic

A septic system was located between buildings 11 and 12. Due to the nature of the materials used in building 12 (solvents, adhesives and paints) it is proposed that the septic tank be investigated through sampling.

Waste Piles

A soil pile was generated during the cleanup of a petroleum release and is staged adjacent to building 14. The soil pile will be properly disposed of following the appropriate sampling.

Transformer

Three transformers were noted to be located adjacent to buildings 15 and 18. No determination could be made if the transformers contained PCBs at the time of the site visit. No staining or stressed vegetation was noted. The presence of PCBs in the transformers should be determined. If PCBs are present, samples may be required.

Underground Piping Including Industrial Process Sewers

Underground piping including former steam pipe chases, and the storm sewer system are located throughout the facility. No evidence of a release in these areas was apparent therefore no sampling is proposed.

Discolored Areas or Spill Areas

A discolored area of soil was noted in the southern portion of the property. What appeared to be oily stains and electrical parts were noted in the vicinity of the discolored soil. It is proposed that sampling be conducted in this area to characterize the material. A discolored area of soil was also observed adjacent to the northeast exterior portion of building 10. It is proposed that sampling be conducted in this area to characterize the material.

Active or Inactive Production Wells

Three inactive production wells were located on the site. The wells were located in the northeast portion of building 5A, in the basement of building 18 and adjacent to the creek in the southeastern portion of the property. No hazardous materials were stored in close proximity to the wells and no visible evidence of a release to the environment was apparent. No sampling is proposed.

Boiler Rooms

The former boiler room was located in buildings 15 and 16. A fuel oil release associated with the former boiler had previously been remediated. Therefore no additional samples are proposed.

NOTICE OF VIOLATION

ATTACHMENT V

ID NO. _____

DATE 6-26-90

NAME OF FACILITY D.S.C. OF NEWARK ENTERPRISES INC.

LOCATION OF FACILITY 333 Hamilton Blvd. S. Plainfield, N.J.

NAME OF OPERATOR Lester Lee

You are hereby NOTIFIED that during my inspection of your facility on the above date, the following violation(s) of the Solid Waste Management Act, (N.J.S.A. 13:1E-1 et seq.) and Regulations (N.J.A.C. 7:26-1 et seq.) promulgated thereunder and/or the Spill, Compensation and Control Act, (N.J.S.A. 58:10-23.11 et seq.) and Regulations (N.J.A.C. 7:1E-1 et seq.) promulgated thereunder were observed. These violation(s) have been recorded as part of the permanent enforcement history of your facility.

DESCRIPTION OF VIOLATION

Ground Water Contaminated
in violation of N.J.S.A. 58:10-23.11E and
N.J.S.A. 58:10-23.1C discharge of a hazardous
substance.

Remedial action to correct these violations must be initiated immediately and be completed by

July 16, 1990. Within fifteen (15) days of receipt of this Notice of Violation, you shall submit in writing, to the investigator issuing this notice at the above address, the corrective measures you have taken to attain compliance. The issuance of this document serves as notice to you that a violation has occurred and does not preclude the State of New Jersey, or any of its agencies from initiating further administrative or legal action, or from assessing penalties, with respect to this or other violations. Violations of these regulations are punishable by penalties of \$25,000 per violation.

TASK ORDER**LUMP SUM**

Task Order No.: 2

This Task Order No. 2 is made this 12th day of June, 1996, by and between ICF Kaiser, Inc. ("Consultant") and Norpak Corporation ("Client") and is hereby incorporated into the Basic Ordering Agreement ("Agreement") between the parties dated August 30, 1995.

1 SCOPE OF WORK

Consultant shall provide the following services:

- Four soil samples will be taken from the base of a 125,000 gallon Aboveground Storage Tank containing No. 2 fuel oil located to the east of Building 11. Each soil sample will be analyzed for Petroleum Hydrocarbons (PHC) and approximately 25% of the samples will be analyzed for Volatile Organic Compounds plus ten Tentatively Identified Compounds.
- Collect one soil sample from the southern portion of the site and one soil sample from the northeast portion of Building 10. Each sample will be analyzed for PHC and PolyAromatic Hydrocarbons (PAH).
- Collect one field blank and field duplicate for PHCs, VOCs, and PAH laboratory analysis.
- Background information will be reviewed on electrical transformers which are present on the exteriors of Buildings 15 and 18 to determine if the transformers contain PCBs.
- Collect one composite sample of a waste pile staged adjacent to Building 14. This sample will be analyzed for Full TCLP, RCRA Characteristics, PHC, and PCB.
- ICF Kaiser will prepare a Site Investigation Report that will include historical information, physical setting, site investigation results, and recommendations.

2 SCHEDULE

Period of performance is June 12, 1996 through December 31, 1996.

3 FEES

In consideration for Services performed hereunder, Client shall pay consultant a firm fixed price of \$3,980.00.

Consultant shall invoice client at the completion of the Site Investigation Report.

Payment terms are net/30 upon receipt of invoice by client.

SECTION 4.0 PROPOSED SITE INVESTIGATION FOR HAMILTON BOULEVARD FACILITY

4.1 Overview

This section presents the proposed Site Investigation for the Hamilton Boulevard Street Facility, South Plainfield, New Jersey. The proposed investigation will be performed in accordance with New Jersey Department of Environmental Protection (NJDEP) Technical Requirements for Site Remediation, N.J.A.C 7:28E, and the most recent NJDEP guidance documents.

A site investigation has been proposed for Areas of Environmental Concern (AEC) identified in the Preliminary Assessment Report. The focus of the the proposed site investigation is to determine if hazardous substances are present in concentrations above the most stringent NJDEP's Cleanup Standards. The Proposed Site Investigation will address the following AECs.

- Section 4.2 - Aboveground Storage Tank (AST) and Piping
- Section 4.3 - Underground Storage Tank (UST)
- Section 4.4 - Discolored Areas
- Section 4.5 - Electrical Transformers
- Section 4.6 - Waste Pile

Section 4.7 will address the information to be included the Site Investigation Report.

Table 4 summarizes the proposed site investigation based on the PA Report for the Hamilton Boulevard Facility.

4.2 Aboveground Storage Tank (AST) and Piping

One 125,000-gallon AST containing No. 2 Fuel Oil is located to the east of Building 14. In accordance with the Technical Requirements for Site Remediation, ICF Kaiser proposes the following site investigation for this AEC:

- Four soil samples will be collected from the base of the AST.
- Each soil sample will be analyzed for Petroleum Hydrocarbons (PHC). Approximately 25% of the samples will be analyzed for Volatile Organic Compounds plus ten Tentatively Identified Compounds (VOC + 10).

4.3 Underground Storage Tanks (USTs)

One 1,500-gallon UST containing No. 2 Fuel Oil is located in the southern end of Building 11. A site investigation has not been proposed in this AEC. In accordance with NJDEP regulations, the UST will be removed during the implementation of the remedial action.

npa.pa

701267

4.4 Discolored Areas

Evidence of oil staining is present in the southern portion of the Site and the northeast end of Building 10. Each affected area is approximately less than 900 square feet. In accordance with the Technical Requirements for Site Remediation, ICF Kaiser proposes to collect one sample from each AEC for PHC and PolyAromatic Hydrocarbons (PAH) analysis.

4.5 Electrical Transformers

Electrical transformers are present on the exteriors of Buildings 15 and 18. Background information will be reviewed by ICF Kaiser to determine the transformers contain PCB. If it is determined that the transformers contain PCB, sampling will be proposed in accordance with the Technical Requirements for Site Remediation.

4.6 Waste Pile

Eighty cubic yards of material consisting of petroleum-contaminated soil is staged adjacent to Building 14. ICF Kaiser proposes to collect a composite sample from this area for waste characterization purposes. The composite sample will be analyzed for Full TCLP, RCRA Characteristics, PHC, and PCB. If the PHC sample result exceeds 10,000 ppm, the composite sample will be analyzed for EPA Priority Pollutant Metals.

This material will be staged on-site until the implementation of the remedial action so that soil disposal costs (e.g. landfill initiation fees, equipment mobilization and demobilization) can be minimized.

4.7 Site Investigation Report

A SI Report will be prepared by ICF Kaiser in accordance with N.J.A.C. 7:26E-3.10. The SI Report will include the following information:

- Historical information;
- Physical setting;
- Site investigation results; and
- Findings and recommendations.

Ms. Lara Coraci
NORPAK CORPORATION
70 Blanchard St.
Newark, NJ 07105

**RE: MEMORANDUM'S OF AGREEMENT (MOA's)
FOR NORPAK PROPERTIES IN NEW JERSEY**

Dear Lara:

Pursuant to our recent discussion, we are submitting costs for performing the Preliminary Assessment portion of 5 MOA's submitted to the NJDEPE by Norpak Corporation. Preliminary Assessments consist of a large amount of background and historical research on the site, and it will be necessary for us to have access to all of Norpak's files on these sites. The following tasks will be accomplished in order to complete the Preliminary Assessments.

- Site inspection by a senior INTEX personnel to determine any areas of environmental concern.
- Review of historical aerial photographs for each site.
- Review of background geology, hydrogeology and soils for each site.
- Review of previous ownership and tenants on each site.
- Review of any previous environmental investigations, releases, spills or violations for each site.

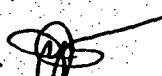

The costs for the above work will be \$2,800.00 per site. If all five assessments can be completed simultaneously, INTEX will perform this work for a lump sum of \$12,000. *did contract price to be reduced by \$3,000.00 to \$9,000.00 for Norpak to perform work, with ENSA assistance, as listed on Schedule A. Norpak will have the option to delete any work on the Blanchard St. site, resulting in a reduction of contract price by \$1,800.00 to \$7,200.00*

Offices Nationwide

Mr. Howard Pollard
Pellmar Laboratories

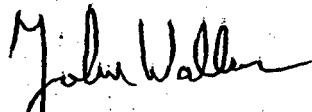

August 2, 1994
Page 2

cost price to be a firm figure for the work necessary to produce
DEPE acceptable PRELIMINARY ASSESSMENT.
K to start immediately and proceed with due diligence.  

These costs assume that Norpak will be able to provide information on previous owners and tenants for inclusion into the report. If a chain of title must be purchased for any site, this will be billed at a separate cost. These costs also assume that Norpak will provide a scaled site plan for each location. If no site plan is available, we will prepare a (not-to-scale) site map based on the site walkover.

If the scope of work and proposed cost outlined above is acceptable, please sign below and return a copy to our office. If you should have any questions regarding this proposal, please contact us.

Sincerely,
ENVIRONMENTAL SERVICES OF AMERICA, Inc.

Schedule A

1. Historical information concerning the site history shall be part of the preliminary assessment unless the remediation is directed at either, a specific discharge event, rather than a particular area of [a site,] concern or any underground tank or underground tank system. The site history shall include an evaluation of the following to the extent available from diligent inquiry:

i. Site history information from [the following] sources including, but not limited to the following:

- (1) Sanborn Fire Insurance Maps;
- (2) MacRae's Industrial Directory;
- (3) Title and Deed;
- (4) Site plans and facility as-built drawings; and
- (5) Federal, State, county and local government files;

ii. The industrial/commercial site history from the time the site was naturally vegetated or utilized as farmland, including without limitation:

- (1) Names of all owners and operators;
- (2) Dates of ownership of each owner;
- (3) Dates of operation of each operator; and
- [(4) Current addresses of each owner and operator; and]
- [(5)] [(4)] Brief descriptions of the past industrial/commercial usage of the site by each owner and operator;

iii. All raw materials, finished products, formulations and hazardous substances, hazardous wastes, hazardous constituents and pollutants which are or were present on the site, including intermediates and by-products;

iv. Present and past production processes, including dates, and their respective water use and shall be identified and evaluated, including ultimate and potential discharge and disposal points and how and where materials are or were received onsite (for example, rail, truck);

v. All former and current containers, container or bulk storage areas, above and below ground tanks, above and below ground waste and product delivery lines, surface impoundments, landfills, septic systems and other structures, vessels, conveyances or units that contain or previously contained hazardous substances, hazardous waste, hazardous constituents and pollutants, including:

- (1) Type;
- (2) Age;
- (3) Dimension of each container;
- (4) Location;
- (5) Chemical content;
- (6) Integrity (for example, tank test reports);
- (7) Volume; [and]
- (8) Construction materials; and

[(9) Inventory control records unless a Department-approved leak detection system pursuant to N.J.A.C. 7:12 or 7:14B has always been in place and there is no discharge history;]

Newark, New Jersey

Attn: Mr. Les Pae

Dear Mr. Pae,

S&D Environmental is pleased to present the following proposal for the cleaning of the basement area at your facility in South Plainfield, New Jersey.

S&D Environmental Services, Inc. is a chemical, oil and industrial waste management firm with experience in many varied types of waste material handling, analysis, transportation and disposal. S&D has a proven track record in the completion of an extensive number of projects involving regulated waste material analysis and disposal. All of our employees working on this project, as a minimum, have the required OSHA 40 hour worker's training and are on a year-round medical surveillance program.

As seen on the site inspection taken on July 16, 1990, there are presently two trench areas containing oil, water and sludge that require cleaning.

The first phase of this project will be to remove the standing water utilizing a vacuum truck. The sludge will be removed by hand feeding an 8" hose connected to a Vacuor Super Vac truck. Once all liquids and sludges are removed, S&D crews will high-pressure wash walls and floors of trench areas. It should be noted that the pressure washer will not remove oil stain that is impregnated into the cement. The wash water will be removed by the Vacuum truck also. The trench areas will be squeegeed dry.

The waste will be disposed of at S&W Waste located in South Kearny, New Jersey, ID: 0991219105.

ment will be due thirty (30) days after presentation of invoices and Customer agrees to pay such invoices in full when due, whether or not Customer has been paid by any insurance carrier or other party against whom it may have a claim. Interest will accrue on all amounts unpaid after the expiration of thirty days from the invoice due date at the rate of 1.8% month, which is an annual percentage rate of 18%, until paid and Customer agrees to pay interest and all costs of collection, including a reasonable attorney's fee in an amount of 20% of our billing.

Environmental appreciates the opportunity to present this proposal. We sincerely look forward to performing this project. Should you require any further information or have any questions, please do not hesitate to call.

Very truly yours,

Robert Poole /KA

Robert Poole
Supervisor

Acceptance of Proposal - The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

Date of Acceptance: 8/7/80

- Analysis		\$ 620.00
- QC	75.00/load x est. 2 loads	150.00

Total Estimated Project Cost Excluding Disposal	\$ 6,255.00
--	--------------------

should be noted that all labor, vehicle and equipment charges are billed on a
 portal to portal basis. Any expendables used are charged in accordance with S&D
 Environmental's current expendable price list.

Time and one half charges apply before 0830 and after 1700 weekdays and
 Saturday. Double time applies for Sunday work and double time and one half for
 holiday work.

The prices listed are firm for 30 days. It should be emphasized that this is an
 estimated cost. Actual work on the project will be invoiced on a unit price
 basis. All billing will be on a net 30 day basis unless specified. Our on-site
 personnel will complete a daily worksheet which will supply specific quantities
 of units of manpower, equipment, materials and supplies, freight and disposal on
 a per day basis. This worksheet is verified by a S&D Environmental on-site
 personnel and submitted to you for verification. This will provide you with a
 daily record of the progress of your project. From the daily worksheets a fair
 and accurate billing is prepared. You are billed specifically for those services
 and quantities you receive.

It should also be emphasized that this estimate contains no provisions for
 federal, state or local taxes, if applicable.
